

Family Wallet — Terms of Service

Last updated: June 12, 2026

1. Acceptance of Terms

By creating an account or using Family Wallet ("the Service", "we", "us"), you agree to these Terms of Service. If you do not agree, please do not use the Service. Family Wallet is a non-commercial student / educational MVP provided for demonstration and learning purposes.

2. Description of the Service

Family Wallet is a shared family finance hub that:

- automatically synchronizes Monobank transactions into a single family feed;
- lets you create isolated groups for shared expenses (e.g. "Family", "Neighbours");
- provides "Secret Gift Mode" for organizing surprise gift collections;
- supports emoji reactions on transactions and money requests between group members.

3. Eligibility and Accounts

You must provide a valid email address and accurate registration information. You are responsible for keeping your credentials confidential and for all activity under your account. One person may hold one account.

4. Roles and Permissions

Each group has an Administrator and Members. Only the Administrator may connect bank cards and invite new members to the group. Any member may organize a specific Secret Gift Event. Money requests may be sent only between members of the same group, and never to yourself.

5. Connecting a Bank Card

To synchronize transactions you provide a Monobank personal API token. You confirm that the card belongs to you and that you are authorized to connect it, and you permit us to receive transaction data through the Monobank API. You may disconnect a card at any time.

6. Secret Gift Mode

Organizers may collect contributions toward a surprise gift while the recipient ("Target User") is automatically excluded from seeing the collection details and total amount until the unlock date. You agree to use this feature in good faith. Family Wallet is not responsible for the real-world fulfilment of any gift.

7. In-app Balances, Transfers and Requests

Transfers and money requests inside the Service operate on in-app (effective) balances used for tracking and coordination. Family Wallet is not a bank, payment service, or money transmitter and does not move, hold, or settle real funds. Any actual movement of money happens outside the Service, directly between the participants.

8. Acceptable Use

You agree not to misuse the Service, attempt unauthorized access, upload unlawful content, spam other users, or interfere with the Service or with other users' data.

9. Intellectual Property

The Service, including its design and content, belongs to the Family Wallet team. You retain ownership of the data you submit and grant us the rights needed to operate the Service for you.

10. Disclaimers

The Service is a non-commercial educational MVP provided "as is" and "as available", without warranties of any kind. It runs on free-tier third-party infrastructure; we do not guarantee uninterrupted availability, accuracy of bank data, or freedom from errors. Nothing in the Service constitutes financial advice.

11. Limitation of Liability

To the maximum extent permitted by law, the Family Wallet team is not liable for any indirect, incidental, or consequential damages, or for any loss of data, profits, or funds arising from your use of the Service.

12. Termination and Account Deletion

You may stop using the Service and request deletion of your account at any time (see the Privacy Policy). We may suspend or terminate access if you violate these Terms.

13. Changes to the Terms

We may update these Terms from time to time. Material changes are reflected by the "Last updated" date above. Continued use of the Service after changes means you accept the updated Terms.

14. Governing Law

These Terms are governed by the laws of Ukraine. The processing of personal data also complies with the EU General Data Protection Regulation (GDPR) where applicable.

15. Contact

For questions about these Terms, contact the Family Wallet team (the project maintainers).
