

Family Wallet — Privacy Policy

Last updated: June 12, 2026

1. Introduction

This Privacy Policy explains how Family Wallet ("we") collects, uses, and protects your data. We process personal data in accordance with the EU General Data Protection Regulation (GDPR) and the Law of Ukraine "On Personal Data Protection". Family Wallet is a non-commercial student / educational MVP.

2. Data We Collect

- Account data: your full name, email address, and a securely hashed password.
- Financial data (with your consent): Monobank transactions, masked card number (PAN), and balances of the cards you connect.
- Activity data: groups you belong to, emoji reactions, money requests, and Secret Gift events you create or join.
- Technical data: a device push token (FCM) if you enable notifications, and basic technical information required to run the Service.

3. How We Collect It

Directly from you at registration; from the Monobank API after you explicitly opt in (consent checkbox) and provide your personal token; and automatically as you use the Service.

4. Legal Basis for Processing

We rely on your consent (for example, connecting a Monobank card or enabling push notifications) and on the necessity of processing to provide the Service you request.

5. How We Use Your Data

To build your unified family feed; to operate groups and roles; to run Secret Gift Mode with automatic target isolation; to send reminders and notifications about gift events; and to secure the Service and prevent abuse.

6. Sharing and Disclosure

Your data is visible to members of your own family group as required by the features (for example, the shared feed). We use third-party processors only to operate the Service: Monobank (transaction data via its API), email delivery (SendGrid), push notifications (Firebase Cloud Messaging), and cloud database hosting (MongoDB Atlas). We do not sell your data or share it for advertising.

7. Secret Gift — Privacy by Design

When a Secret Gift collection targets you, its details and total amount are hidden from you until the unlock date. This isolation is enforced on the server side so the surprise is preserved.

8. Storage and Security

Data is transmitted over HTTPS and stored on third-party cloud infrastructure. Passwords are stored only as hashes. Access controls ensure that only members of your group can see that group's data. As a free-tier educational project, we cannot guarantee absolute security.

9. Data Retention and Deletion

- Monobank transaction data is not retained after you disconnect the corresponding card.
- You may request deletion of your account. Upon deletion, your personal data (name, email) is removed and your past transactions are anonymized (shown as "Deleted user") so that group history remains consistent.

10. Your Rights (GDPR)

You may request access to, correction of, or deletion of your data; restrict or object to processing; request portability; and withdraw consent at any time. To exercise these rights, contact the Family Wallet team.

11. Children

The Service is not directed to children under 16, and we do not knowingly collect data from children.

12. Cookies and Local Storage

We use local storage for your session token and interface preferences that are necessary to operate the Service. We do not use third-party advertising cookies.

13. Changes to this Policy

We may update this Policy from time to time; the "Last updated" date above will change accordingly.

14. Contact

For privacy questions or data requests, contact the Family Wallet team (the project maintainers).
